

Passionate self-taught web developer with a solid grasp of programming principles and web development. Keen to play a key role in team achievements by leveraging diligence, meticulous attention to detail, and strong organizational abilities. Driven to expand knowledge, evolve, and succeed in the computer-related domain, particularly in web development. Proficient in constructing a web presence from inception, showcasing skills in HTML5, CSS3, JavaScript, React, and various other web development technologies. A quick learner, dedicated team player, and hardworking individual adept at adapting to diverse design patterns, programming languages, and multimedia web tools.

## TECHNICAL SKILLS

## EDUCATION

### Bachelor of Science in Information Technology

Jun 2010 - Apr 2015

#### Cor Jesu College

Davao, Philippines

Focused on Java, Mysql and Php fundamentals in building system and mobile applications.

Course work:

- Fundamentals of Programming, including basic concepts and principles
- Intermediate Programming skills, including proficiency in one or more programming languages
- Strong understanding of Data Structures and Algorithms, with experience in implementing efficient solutions
- Knowledge of Information Management principles and practices
- Experience in Applications Development and familiarity with emerging technologies

## PROJECTS

### Korean Education App (Freelance)

[diveintothepond.com](http://diveintothepond.com)

- Played a minor role in enhancing the Letitu education platform by contributing to the creation of a new feature. Leveraging cutting-edge technologies, including Next.js, Vue 3, Nuxt.js, TypeScript, Figma, and Tailwind CSS.
- Contributed to the platform's expansion, providing high school students with options to choose and reserve mentors for their preparation for college while adhering to specific client guidelines and requests.
- Utilized Nuxt's routing system in defining pages and layouts for the application.
- Used communication tools like Slack, Microsoft Teams, or similar platforms to facilitate collaboration and discussion among team members.

### Photography Website (Freelance)

[deo-photography.vercel.app](http://deo-photography.vercel.app)

- Developed a responsive photography portfolio website using React, Tailwind CSS, GSAP, and Framer Motion. The website showcases the photographer's work with dynamic content and immersive animations.
- The website is designed to seamlessly adapt to various screen sizes and devices, ensuring a consistent and optimal viewing experience for users across desktops, tablets, and mobile devices.
- Utilizing React.js, the website incorporates dynamic content rendering, allowing for easy management and updates of the showcased photographs and related information.
- Tailwind CSS is employed to create a visually appealing and cohesive design aesthetic, with customizable and reusable components contributing to efficient development and maintenance.

## Colab Project to highlight team built applications

### vite-starter-gold.vercel.app

- Collaborated as a key team member in the development of a web application using Vite, TypeScript, TailwindCSS, PostgreSQL, Docker, Express, Vercel ,and GitHub to showcase projects and highlight the tech stack used.
- Used a version control system like Git, and hosted our repository on GitHub. Created branches for different features or bug fixes to work on separately.
- Utilized GSAP Observer to implement theme updates and scroll effects.

## Made an online game shop web application.

### gameshop.vercel.app

- Developed a web application using NextJs react framework and Snipcart API to handle item addition and user payment method
- Populated content by making API calls to a headless CMS based on GraphQL
- Utilized react-bootstrap/Accordion and MUI libraries for product design and functionality
- Managed local and remote data, including utilizing the Apollo Client state management library to efficiently manage state in the application
- Utilized GSAP's timeline and scroll trigger to enhance user experience with engaging animations and seamless page transitions

## Created a website for a cafe shop

### littlesips.vercel.app

- Created a website using React.js for a client's cafe located in New Jersey,US to hone my skills doing real world projects after 4 months of learning React.js.
- Implemented the react-grid module to add a gallery for displaying products in a carousel format and React router to create pages showcasing products and company information..
- Integrated the Google Map API into the location page to enable cafe location search.
- Utilized GSAP's timeline and scroll trigger to enhance user experience with engaging animations and seamless transitions between pages.

## A Simple Car Navigation App

### car-navigation.vercel.app

- Developed two dashboards for different users, providing them with customized and user-friendly interfaces using React and Bootstrap. (After 2 months of learning React.js)
- Utilized leaflet map service to implement navigation and tracking functionalities, enhancing the user experience.
- Created a CRUD app that utilized Axios to seamlessly fetch and update data, ensuring efficient data management.

## Portfolio

### stephenuy.vercel.app

- Developed the project within the first 6 months of learning HTML5, CSS3, and vanilla JavaScript.
- Utilized HTML DOM's getBoundingClientRect method to retrieve image and text coordinates for implementing scroll animation effects.
- Utilized emailjs API to establish a connection between the contact me section and my email address
