Cor Jesu College   Davao,Philippines

Focused on Java, MySQL, and PHP fundamentals for system and mobile app development. Coursework includes:

- Fundamentals of Programming
- Intermediate Programming skills
- Strong understanding of Data Structures and Algorithms
- Knowledge of Information Management principles
- Experience in Applications Development and emerging technologies.

PROJECTS

Korean Education App (Freelance)

diveintothepond.com

- Played a minor role in enhancing the Letitu education platform by contributing to the creation of a new feature. Leveraging cutting-edge technologies, including Next.js, Vue 3, Nuxt.js, TypeScript,Figma, and Tailwind CSS.
- Utilized Nuxt's routing system in defining pages and layouts for the application.
- Used communication tools like Slack, Microsoft Teams, or similar platforms to facilitate collaboration and discussion among team members.

Photography Website (Freelance)

deopalculanphotohraphy.com

- Created a responsive photography portfolio website using React, Tailwind CSS, GSAP, and Framer Motion.
- Features dynamic content and immersive transistions. Seamlessly adapts to various screen sizes and devices.
- Utilizes React.js for dynamic content rendering. Tailwind CSS for visually appealing design.

Colab Project to highlight team built applications

vite-starter-gold.vercel.app

- Collaborated as a key team member in the development of a web application using Vite, TypeScript, TailwindCSS, PostgreSQL, Docker, Express, Vercel ,and GitHub to showcase projects and highlight the tech stack used.
- Used a version control system like Git, and hosted our repository on GitHub. Created branches for different features or bug fixes to work on separately.
- Utilized GSAP Observer to implement theme updates and scroll effects.

Made an online game shop web application.

gameshop.vercel.app

- Created a Next.js web app with Snipcart API for item addition and payments.
- Content populated via GraphQL-based headless CMS API calls. Used react-bootstrap/Accordion and MUI for design and functionality.
- Managed data locally and remotely with Apollo Client for efficient state management.
- Enhanced user experience with GSAP animations and seamless page transitions.

Created a website for a cafe shop

littlesips.vercel.app

- Built a Next.js web app with Snipcart for payments, GraphQL headless CMS for content, and react-bootstrap/MUI for design.
- Managed data efficiently using Apollo Client. Improved user experience with GSAP animations and smooth page transitions.

Portfolio

stephenuy.vercel.app

- Created project within first 6 months of learning HTML5, CSS3, and vanilla JavaScript.
- Implemented scroll animation effects using HTML DOM's getBoundingClientRect method.
- Established connection between contact section and email address using emailJs API.
